# ECODENSE BOILER ACCUMULATION TANK

## Features:

- 18kg/m<sup>3</sup> density soft polyurethane (sponge) High efficiency with 80mm insulation thickness,
- WRAS (drinkable water) certified titanium doped enamel,
- Easy thanks to the cleaning flange integrated in the tank and hygienic care advantage,
- Integrated design with thermometer,
- Maximum operating temperature up to 95°C possibility,
- 10 Bar working pressure / 13 Bar test pressure,
- Uninterrupted hot water with optional electric heater possibility,
- Cathodic protection with magnesium anode rod,
- 100, 160, 200, 300, 500, 800, 1000, 1500, 2000, 11 different widths as 2500 and 3000 Litres capacity option,
- Condensing boiler, Conventional Burner and Heat Use in heating systems such as pump appropriate,
- Compact design makes it easy to use in any environment convenient use option,
